

**MannTek**

# Key benefits

- Rapid.
- Cost-efficient.
- Safe.
- Environmentally friendly.
- Reliable.

# DAC

---

Specially designed for handling aviation fuel and can be found at any point in the aviation fuel logistics.

- Dry aviation couplings according to ISO 45 / STANAG 3105.
- Material: Aluminium, Stainless Steel. No yellow parts in contact with media.
- Seals: FKM, NBR, low temp seals etc.
- Available with threaded and flanged connections, for both hose unit and tank unit.
- Working Pressure: 10 bar.
- Not approved for underwing refuelling.

## Technical data DAC

	2½" (DN65)		
Socket	105 mm		
Threaded connections	BSP and NPT		
Flanged connections	EN/ANSI/TW/TTMA		
Flow rate	Up to 2.100 L/min		
Materials	Aluminium, Stainless Steel	Thread	Flange
		HU 3,4 kg TU 1,9 kg	HU 10 kg TU 4,9 kg
Seals	FKM, NBR
